

Model 3208-H “Horizontal” Style Chamber

The Model 3208-H is designed to be used in conjunction with the 3200 / 3201 Liquid Level Controller, in applications where internal obstructions prevent direct installation of the level control, or to isolate the level control from fluid turbulence within the vessel.

Features:

Compact design for limited spaces
Threaded level controller and vessel connections

Specifications:

Level Controller Connection

2", Threaded (FNPT)

Vessel Connection

1", Threaded (FNPT)

Materials of Construction

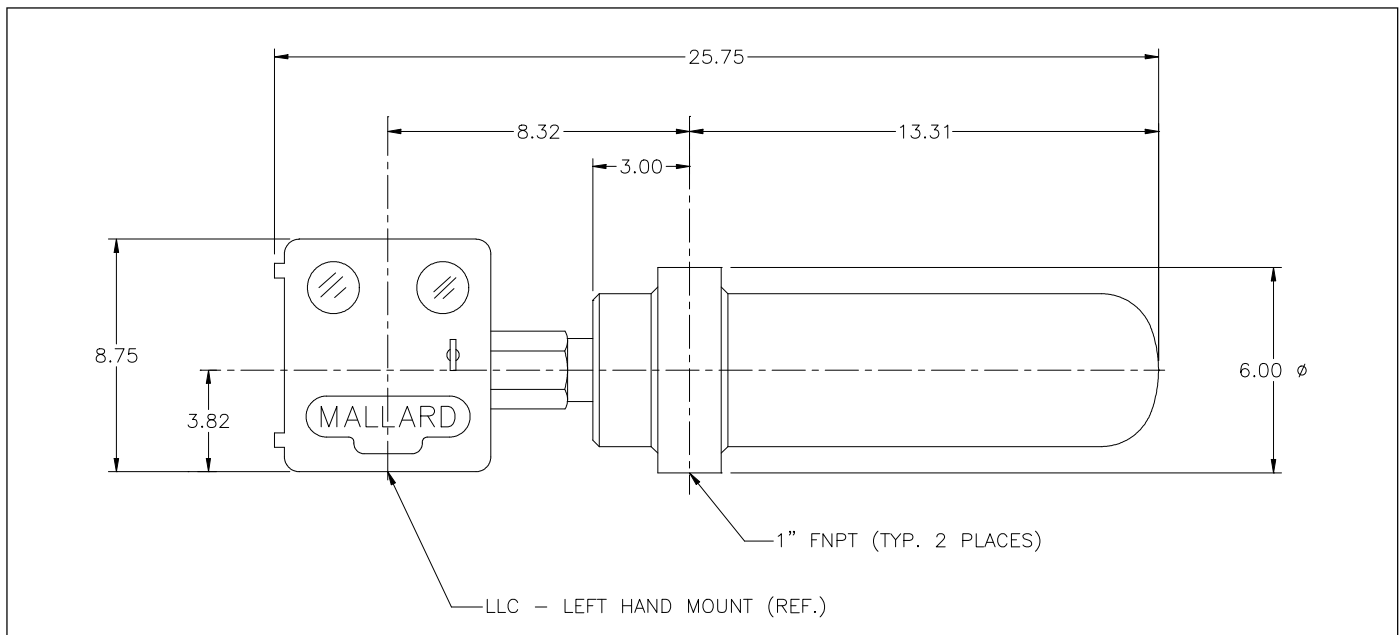

Carbon Steel or 316 SST

Max. Pressure Rating

2000 psi

Dimensions:

How to Order:

1. If no special options are required (non-standard material of construction, non-standard level controller connection, or non-standard vessel connections), then place your order by simply referring to the Mallard Model 3208-H.
2. If special options are required, consult your local Mallard representative for assistance.
