

The Model 5601 is an adjustable air regulator designed for instrumentation and general purpose. Careful design and quality materials throughout assure long, trouble-free operation in the most difficult industrial environments. The Model 5601NF is a non-filter regulator built to the same specifications as the 5601.

Features:

- Superior regulation characteristics
- Rugged, corrosion-resistant construction
- Excellent stability and repeatability
- Built-in 40 micron filter and dripwell (5601 only)
- Self-relieving
- Low droop at high flow
- Variety of mounting options
- Low cost

Specifications:

- Flow Capacity: 20 scfm @ 100 psig supply, 20 psig outlet
- Sensitivity: 1" of water
- Supply Pressure: 250 psig maximum
- Air Consumption: Less than 6 scfh

How does our Model 5601 compare with Fisher's 67AFR? The choice is clear!

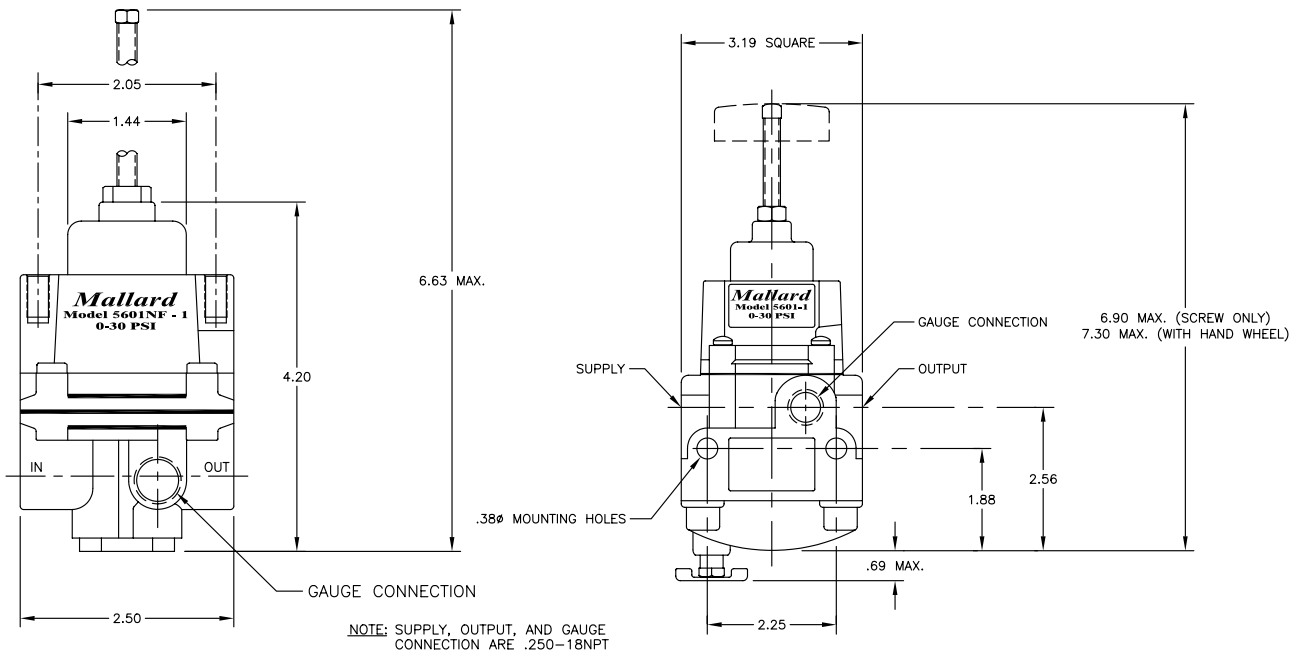

Features	Mallard 5601/5601NF	Fisher 67AFR
Ranges	All units are zero psi based and can be used as an on/off valve. 0-120 can be used to replace all ranges.	Units are not zero psi based. Ranges are 5-35, 5-60, 35-125.
Gauge Port	Gauge port is always tapped and a plug is included in shipping box.	Gauge port is optional.
Filter (5601 only)	Filter is polycarbonate, will not absorb moisture causing flow restriction, and can be cleaned.	Paper filter absorbs moisture, and cannot be cleaned.
Dripwell (5601 only)	Assembled with single 1/2" bolt for ease of repair and clean-out.	Assembled with four Torx bolts.
Flow Capacity	20 scfm at 100 psi supply and 20 psi outlet.	12.5 scfm at 100 psi supply and 25 psi outlet.

Ordering Information:

Model No.	Output Range
5601-1	0-30 psi
5601-2	0-60 psi
5601-3	0-120 psi
5601NF-1	0-30 psi
5601NF-2	0-60 psi
5601NF-3	0-120 psi
